The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect your business or any weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Introduction

This paper provides the Audit Committee with a report on progress in delivering our responsibilities as your external auditors. The paper also includes a summary of emerging national issues and developments that may be relevant to you as a Council.

Members of the Audit Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector at www.grant-thornton.co.uk/en/Services/Public-Sector/ and where you can also download copies of our publications.

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

Progress at November 2014

Work	Planned date
<p>Interim accounts audit Our interim work will include:</p> <ul style="list-style-type: none"> • work to understand how the Council's functions are delivered, the control environment and the framework of controls for financial systems • walkthrough testing to confirm whether controls are implemented in accordance with our understanding in areas where we have identified a possible risk of material misstatement • early substantive testing • early work on any emerging accounting issues. 	February 2015
<p>2014-15 Accounts Audit Plan Under auditing standards we are required to issue a detailed accounts audit plan setting out our proposed approach to the audit of the 2014-15 financial statements.</p>	March 2015
<p>2014-15 final accounts audit Work to complete our audit of the 2014-15 financial statements.</p>	August - September 2015
<p>Value for Money (VfM) conclusion</p> <p>Our VfM conclusion is based on the following criteria specified by the Audit Commission:</p> <ul style="list-style-type: none"> • the organisation has proper arrangements in place for securing financial resilience; • the organisation has proper arrangements for challenging how it secures economy, efficiency and effectiveness. <p>Our work will be based on a risk assessment to identify areas of risk to our VfM conclusion. The results of our VfM audit work and the key messages arising will be reported in our Audit Findings Report.</p>	February - September 2015

Rising to the challenge - The evolution of local government

Grant Thornton

Our national report 'Rising to the challenge - The evolution of local government' is available at: http://www.grant-thornton.co.uk/Global/Publication_pdf/rising-to-the-challenge-the-evolution-of-local-government.pdf

Our report, based on a review of 40% of the sector, assesses whether English local authorities have the arrangements in place to ensure their sustainable financial future. The fourth in an annual series, the report has a positive message overall. Most local authorities have continued to rise to the challenge posed by government funding reductions, Supported by an evolution in financial management arrangements over the past four years.

The overall message is a positive one. What stands out is how local authorities have navigated the first period of austerity in the face of ever increasing funding, demographic and other challenges. Many authorities are forecasting financial resilience confidently in their medium term financial strategy. This reflects an evolution in financial management that would have been difficult to envisage in 2010.

However, there remains much to be achieved if the sector is to become sustainable in the long term, and authorities should consider if their:

- medium- to long-term strategy redefines the role of the authority creatively
- operational environment will adapt, working in partnership with other authorities and local organisations
- strategy looks beyond the traditional two- to three-year resource planning horizon
- organisational culture is aligned to where the authority needs to be in the medium to long term
- senior leadership teams – both officers and members – have the necessary skills and capacity to ensure delivery against the medium-term challenges
- corporate governance arrangements ensure effective oversight and scrutiny of the organisation as it adapts to the challenges it faces.

The importance of these actions will be magnified if local government devolves further, particularly in relation to fiscal devolution. The new-found confidence of local government in responding to the medium-term challenges will be tested significantly by the second phase of austerity.

Hard copies of our report are available from your Engagement Lead or Audit Manager.

2020 Vision

Grant Thornton

Our national report '2020 Vision' is available at: <http://www.grant-thornton.co.uk/en/Publications/2014/2020-Vision-Exploring-finance-and-policy-futures-for-English-local-government-as-a-starting-point-for-discussion/>

In a time of unprecedented challenge for English local government, how can the sector develop towards 2020 if it is to have a sustainable future? Our latest report provides a thorough analysis of the current political and economic context, explores a range of potential policies and outcomes, and suggests several scenarios to facilitate an open debate on the future for the sector.

Produced in collaboration with the University of Birmingham's Institute for Local Government Studies (INLOGOV), our report suggests that fundamental changes to local government are both operationally necessary and constitutionally inevitable, for the sector to remain relevant by 2020. The report offers a thorough analysis of the current political and economic context and explores a range of potential future policies and outcomes that English local government will need to adopt and strive towards as they seek to adapt and overcome these challenges.

Placed in the context of enhanced devolution, following the Scottish independence referendum, 2020 Vision maintains a wary eye fixed on the 2015/16 Spending Round and looks ahead to the life time of the next government. It highlights that the economic and financial situation remains increasingly untenable, with an expanding North/South divide arising from the pattern of funding reductions and economic growth.

English local authorities continue to face unprecedented challenges, relating to the pressures of austerity and central government funding reductions, and demographic and technological change. Our report highlights the vital role of a successful local government sector and encourages it to think hard about how it will cope in the future.

Informed by the views of a broad range of local authority leaders, chief executives and other sector stakeholders, the report offers a set of six forward-looking scenarios* in which councils could be operating within by 2020. Though not mutually exclusive, we suggest that key stakeholders need to take urgent action to avoid a potential slow and painful demise for some councils by 2020.

Pulling together the Better Care Fund

Grant Thornton

Our national report 'Pulling together the Better Care Fund' is available at: <http://www.grant-thornton.co.uk/en/Publications/2014/Pulling-together-the-Better-Care-Fund/>

Do local authorities and clinical commissioning groups (CCGs) have effective arrangements to develop joint Better Care Plans for agreement by the health and wellbeing boards (HWBs) and how ready are they for the pooled fund in April 2015?

Our report draws on our review of the introduction of draft Better Care Fund (BCF) plans for both the February and April submissions. It is based on a sample of our findings from 40 HWB localities. It considers the partnership arrangements across a HWB planning area and is supported by discussions with the sector, across the country. The result is a snap shot of progress as at 30 June 2014, prior to the issue of revised planning guidance by NHS England and the Local Government Association on 25 July 2014.

It provides you with:

- an understanding of how your approach to introducing BCF compares to others across the country
- assistance in identifying the key issues to delivering Better Care Fund plans effectively
- insight into current best practice
- practical areas for consideration for improving arrangements in the future.

Where Growth Happens

Grant Thornton

Our national report 'Where Growth Happens' is available at: <http://www.grant-thornton.co.uk/en/Publications/2014/Where-growth-happens-The-high-growth-index-of-places/>

As the UK emerges from recession, increasing attention is being given, both nationally and locally, as to how to accelerate economic sector growth. Our report presents the findings of research undertaken by our Place Analytics team on the dynamics of local growth. It will give FDs and CEOs of local authorities and LEPs:

- an insight into the geographic areas of high growth and dynamic growth (ie the quality of growth)
- an understanding of the characteristics of both growing and dynamic places to help frame policy and sustain future growth
- an understanding of growth corridors and their implications, not only for UK policy makers, but also for those locally sitting within and outside the corridors
- an insight into the views of different leaders charged with making growth happen in their locality.

The report provides a ranking of English cities according to their economic growth over an eight year period (2004 – 2012). Outside of London – which maintains eight of the top 10 best performing districts overall – it places Manchester, Birmingham and Brighton and Hove in the top three, as measured by economic, demographic and place (dwelling stock and commercial floor space) growth.

The analysis also assess the quality of local growth - or 'dynamism' - to identify areas with a vibrant and dynamic economy capable of supporting future expansion, based on five key drivers. London again tops the ranking, with nine out of the top 10 dynamic growth areas. Outside the capital, Cambridge, Reading and Manchester top the list of future sustainable growth.

Based on this analysis of past progress and future prospects, our report reveals a number of 'growth corridors' – functional and large scale local economic areas in England – which are playing a significant role in the country's overall growth levels. Though predominantly stemming from London, the intra-city growth corridors include a number of other large cities at their core, creating a network of key strategic linkages between high growth and dynamic areas.

Group accounting standards

Accounting and audit issues

The CIPFA Code has adopted a new suite of standards for accounting for subsidiaries, associates and joint arrangements. These changes affect how local authorities account for services delivered through other entities and joint working with partners.

The key changes for 2014/15 are to:

- the definition of control over 'other entities'. The revised definition is set out in IFRS 10 and determines which entities are treated as subsidiaries
- the accounting for joint arrangements. This now follows IFRS 11 and includes changes to the definition of joint ventures and how joint ventures are consolidated in group accounts
- disclosures in relation to subsidiaries, joint arrangements, associates and unconsolidated entities as set out in IFRS 12.

Changes to the definition of control over 'other entities'

Control was previously defined in terms of power to govern the financial and operating policies of an entity. IFRS 10 sets out three elements for an investor to be considered as controlling an investee (all of which must be met):

- the investor has the rights to direct the relevant activities of the investee (relevant activities being the ones that determine the return for the investors – the return could be in the form of a service rather than money)
- the investor has exposure, or rights, to variable returns from its involvement with the investee
- the investor has the ability to use its power over the investee to affect the amount of the investor's returns.

In the commercial sector, this is generally thought to have resulted in more entities being treated as subsidiaries. However, the change is in both directions: some subsidiaries have been redefined as associates. Local authorities with investments in 'other entities' will need to consider whether:

- they control any entities using the new definition. Local authorities will need to pay particular attention to special purpose vehicles and any other entities where there was a close judgement call under the old IAS 27
- there is a need for a prior period adjustment.

Group accounting standards (continued)

Accounting and audit issues

Changes to accounting for joint arrangements

Joint arrangements are contractual arrangements between two or more parties where there is joint control. IFRS 11 makes three key changes from IAS 31:

- there are now only two types of joint arrangements: joint operations and joint ventures
- In a joint operation the investing parties have rights and obligations in relation to the arrangement's assets and liabilities, whereas in a joint venture the parties have rights to the arrangement's net assets. IFRS 11 bases its definition of joint ventures on the substance of the arrangement rather than legal status. It is for the entity to assess whether a joint arrangement is a joint operation or joint venture by considering its rights and obligations arising from the arrangement. To do this the entity needs to consider the structure and legal form of the arrangement, the terms agreed by the parties and any other relevant facts and circumstances. Appendix B to IFRS 11 provides further explanation and examples of joint operations and joint ventures.
- local authorities are still required to consolidate joint ventures in their group accounts but must now do so using the equity (single line) method. The option for proportionate (line-by-line) consolidation has been removed.

The key challenge for most local authorities will be determining whether their joint arrangements are joint ventures or joint operations. The difference should be clear from the contract but in some cases judgement may be required. Local authorities that have previously used the proportionate consolidation method will need to account for the move to equity accounting as a prior period adjustment.

Disclosure of interests in other entities

IFRS 12 makes consistent the requirements for disclosures in relation to subsidiaries, joint arrangements, associates and unconsolidated entities. It includes the need for transparency about the risks to which the reporting entity is exposed as a consequence of its investment in such arrangements.

Challenge questions

- Has your finance team assessed the potential impact of these standards on the financial statements?

Earlier closure and audit of accounts

Accounting and audit issues

DCLG is consulting on proposals to bring forward the audit deadline for 2017/18 to the end of July 2018. Although July 2018 is almost 4 years away, both local authorities and their auditors will have to make real changes in how they work to ensure they are 'match-fit' to achieve this deadline. This will require leadership from members and senior management. Local government accountants and their auditors should start working on this now.

Top tips for local authorities:

- make preparation of the draft accounts and your audit a priority, investing appropriate resources to make it happen
- make the year end as close to 'normal' as possible by carrying out key steps each and every month
- discuss potential issues openly with auditors as they arise throughout the year
- agree key milestones, deadlines and response times with your auditor
- agree exactly what working papers are required.

Challenge questions

- Has your finance team begun to explore plans to address the earlier close date?

Financial sustainability of local government

Local government guidance

In November the National Audit Office published their report on the [Financial Sustainability of Local Government](#).

The report concludes that Local authorities have coped well with reductions in government funding, but some groups of authorities are showing clear signs of financial stress. The Department for Communities and Local Government has a limited understanding of authorities' financial sustainability and the impacts of funding cuts on services, according to the National Audit Office.

The Government reduced its funding to local authorities by an estimated 28% in real terms between 2010-11 and 2014-15. Further planned cuts will bring the total reduction to 37% by 2015-16, excluding the Better Care Fund and public health grant. Although there have been no financial failures in local authorities in this period, a survey of local auditors shows that authorities are showing signs of financial pressure. Over a quarter of single tier and county councils had to make unplanned reductions in service spend to deliver their 2013-14 budgets. Auditors are increasingly concerned about local authorities' capacity to make further savings, with 52% of single tier and county councils not being well-placed to deliver their medium-term financial plans.

There are significant differences in the scale of funding reductions faced by different authorities. Authorities that depend most on government grant are the ones most affected by funding reductions and reforms. This was an outcome of policy decisions to tackle the fiscal deficit by reducing public spending, and for local authority funding to offer incentives for growth.

Local authorities have tried to protect spending on social care services. Other service areas such as housing services and culture and leisure services have seen larger reductions. While local authorities have tried to make savings through efficiencies rather than by reducing services, there is some evidence of reduction in service levels.

According to the NAO, however, the Department does not monitor in a coordinated way the impact of funding reductions on services, and relies on other departments and inspectorates to alert it to individual service failures. In consequence, the Department risks becoming aware of serious problems with the financial sustainability of local authorities only after they have occurred.

The Department's processes for assessing the capacity of authorities to absorb further funding reductions are also not sufficiently robust.

Local government financial reporting remains strong

Local government guidance

The Audit Commission published its report, [Auditing the Accounts 2013/14: Local government bodies](#), on 11th December.

Financial reporting was consistently strong for most types of principal local authority in 2013/14 when compared to the previous financial year. This year the Commission has congratulated 16 bodies where auditors were able to issue an unqualified opinion and a VFM conclusion on the 2013/14 accounts by 31 July 2014, and the body published audited accounts promptly. Although, as only 21 principal bodies have managed to publish their audited accounts by 31 July since 2008/09, a move to bring the accounts publication date forward is likely to cause significant challenges for the majority of public bodies.

The Commission reports that auditors were able to issue the audit opinion by 30 September 2014 at 99 per cent of councils, 90 per cent of fire and rescue authorities, 97 per cent of police bodies, all other local government bodies and 99 per cent of both parish councils and internal drainage boards. This is consistent with last year for most groups, but an improvement for councils and small bodies compared to 2012/13.

Eight principal authorities were listed where the auditor was unable to issue an opinion by the 30 September deadline.
