The Council may need to borrow short term for cash flow purposes, exceeding the operational boundary. The operational boundary allows for £1m headroom in addition to our capital plans.

For 2019/20 the Net Borrowing is defined as gross external debt less investments. The net borrowing requirement may not, except in the short term, exceed the total capital financing requirement in the preceding year, plus the estimates of any additional financing.

General Fund - This is an indicator of the affordability of the capital programme and its effect on the Council Tax. This indicator shows change in Borrowing Cost and MRP charged to the Revenue Budget because of movement in Capital Strategy from November 2015 to January 2016. HRA - This is an indicator of the affordability of the capital programme and its effect on the rent payer. From 2012/13 under self financing, the cost of borrowing, in terms of interest cost, and any provision for the future reduction in debt liability, is covered by no longer making contributions to CLG in the form of negative subsidy payments. The reported figures reflect the change on investment interest due to movement in HRA Capital Programme from November 2015 to January 2016.

Actual Gross Debt 2016/17				3,079	206,415	209,494		
Actual Gross Debt is the actual borrowing for any purpose plus other relevant long-term liabilities. It should not, except in the short term, exceed the CFR in the previous year plus the estimates of any increase in the CFR at the end of the current and next two financial years. If in any of these years, there is a reduction in the CFR, this reduction is ignored in estimating the cumulative increase in the CFR which is used for this comparison with external debt.
