

Dear Julie

I wish to object to the variation of the premises licence, extending the trading hours to 3.30 am Thursday to Saturday and 2 am Sunday to Wednesday.

This food business is based in a noise sensitive area, in that we receive complaints from local residents about noise from businesses in this area. Although Environmental Health have not received any specific noise complaints from local residents about noise from the operation of this food business with their current trading times. The extension of trading hours will exceed the trading hours of other food businesses in the area. The application does not include any information of any measures to be put in place to prevent public nuisance.

I have concerns that the later trading hours are likely to cause nuisance to local residents, this may arise from customers using the takeaway after drinking at other premises locally and also the operation of equipment, namely kitchen extract ventilation system into the early hours. The ambient background noise levels will be much reduced at 3.30 am with reduced road traffic noise, plant and equipment at other premises will be switched off, resulting in the equipment at Chickaros being prominent and likely to disturb local residents.

Kind regards

Mrs Sue Bedford
