Dear Audit Committee Members

We are pleased to attach our Final Audit Results Report for the forthcoming meeting of the Audit Committee. This report provides an update on our initial Audit Results Report issued in February 2022 and summarises our final audit conclusion in relation to the audit of Stevenage Borough Council (the Council) for 2019/20.

The audit of the 2019/20 audit of Stevenage Borough Council has not been straight forward for a number of reasons, including the impact of the Covid-19 pandemic both in terms of audit risks and our planned procedures to address those risks, as well as the number of issues identified during the audit. We acknowledge that the resourcing of our local government audits remains a challenge due to the shortage of staff within the local government audit market with the specific skills and knowledge required to conduct an effective audit. We have had to make difficult decisions to delay the delivery of audits across all of our audited entities in order to safeguard audit quality. We would like to thank all the Council's officers who supported the audit process.

We have substantially completed our audit of the Council for the year ended 31 March 2020. Our remaining procedures, which will be completed towards the end of March 2023, mainly consist of the completion of our internal quality assurance review procedures on the final assembly of audit working papers and consultation processes in relation to the Council's non-compliance with the minimum decent home standards and whether we need to include an emphasis of matter in regards to property asset valuation uncertainty. Subject to concluding the outstanding matters listed in our report, we confirm that we expect to issue an unqualified audit opinion on the financial statements in the form at Appendix C of this report by the 31 March 2023. We expect to also issue an unmodified opinion in relation to the Council's value for money conclusion.

This report is intended solely for the use of the Audit Committee, other members of the Council and senior management. It should not be used for any other purpose or given to any other party without obtaining our written consent. We would like to thank your staff for their help during the audit. We welcome the opportunity to discuss the contents of this report with you at the Audit Committee meeting on 27 March.

Yours faithfully

Debbie Hanson
Partner
For and on behalf of Ernst & Young LLP

Contents

Public Sector Audit Appointments Ltd (PSAA) have issued a 'Statement of responsibilities of auditors and audited bodies'. It is available from the Chief Executive of each audited body and via the PSAA website (www.psa.co.uk). This Statement of responsibilities serves as the formal terms of engagement between appointed auditors and audited bodies. It summarises where the different responsibilities of auditors and audited bodies begin and end, and what is to be expected of the audited body in certain areas. The 'Terms of Appointment (updated April 2018)' issued by PSAA sets out additional requirements that auditors must comply with, over and above those set out in the National Audit Office Code of Audit Practice (the Code) and statute, and covers matters of practice and procedure which are of a recurring nature.

This Audit Results Report is prepared in the context of the Statement of responsibilities / Terms and Conditions of Engagement. It is addressed to the Members of the audited body, and is prepared for their sole use. We, as appointed auditor, take no responsibility to any third party.

Our Complaints Procedure - If at any time you would like to discuss with us how our service to you could be improved, or if you are dissatisfied with the service you are receiving, you may take the issue up with your usual partner or director contact. If you prefer an alternative route, please contact Hywel Ball, our Managing Partner, 1 More London Place, London SE1 2AF. We undertake to look into any complaint carefully and promptly and to do all we can to explain the position to you. Should you remain dissatisfied with any aspect of our service, you may of course take matters up with our professional institute. We can provide further information on how you may contact our professional institute.

01 Executive Summary

Executive Summary

Status of the audit

We have substantially completed our audit of the Stevenage Borough Council financial statements for the year ended 31 March 2020 and have performed the procedures outlined in our Audit Plan.

The outstanding work at the date of this report is:

- ▶ The outcome of the internal consultation with EY's professional practice department on the non-compliance with the minimum decent home standards and whether we need to include an emphasis of matter in regards to property asset valuation uncertainty.
- ▶ Completion of subsequent events review up the date of our audit report, including update of our review of committee minutes.
- ▶ Final review and completion checks on the financial statements.
- ▶ Completion of audit conclusion procedures, in order to issue our audit report.
- ▶ Receipt of the signed management representation letter.

Subject to satisfactory completion of the following outstanding items above and the result of our consultation related to emphasis of matter in regards to property asset valuation uncertainty, we expect to issue an unqualified opinion on the Council's financial statements in the form which appears at Appendix C.

Executive Summary

Scope update

In our Audit Plan dated 9 June 2020, we provided you with an overview of our audit scope and approach for the audit of the financial statements, including our assessment and planned response of risks arising from the Covid-19 pandemic on the financial statements. We carried out our audit in accordance with this plan, with the following exceptions:

- ▶ **Timescale of the audit** - The audit of the Council's 2019/20 financial statements has been protracted for a number of reasons:
 - ▶ Increased audit risks as the result of the Covid-19 pandemic (as reported in our Audit Plan).
 - ▶ Increased audit testing due to the reduced materiality compared to the prior year 2018/19 audit (as reported in our Audit Plan).
 - ▶ Multiple changes in the Council's key financial personnel throughout the audit period. This has increased the time taken to resolve audit queries and agree on amendments to the financial statements.
 - ▶ The number of audit misstatements identified and the complexity of adjustments required to the financial statements. In particular, the incorrect accounting treatment adopted for Local Enterprise Partnership (LEP) funding as grant income in the draft financial statements.
 - ▶ The current challenges in the local government audit sector, including increased quality demands from the FRC (as the audit regulator) and the challenge of clearing delayed audits across the sector.

- ▶ **Materiality** - We updated our planning materiality assessment using the 2019/20 draft statement of accounts. Based on our materiality measure of 1% of gross expenditure on the provision of services, we updated our overall materiality assessment to £1.05 million (Audit Plan – £1.11 million). This results in an updated performance materiality, at 75% of our overall planning materiality, of £0.792 million, and an updated threshold for reporting misstatements of £52,777 (5% of planning materiality).

- ▶ **Information Produced by the Entity (IPE)** - We identified an increased risk around the completeness, accuracy, and appropriateness of information produced by the entity due to the inability of the audit team to verify original documents or re-run reports on-site from the Council's systems as a result of Covid restrictions. We undertook the following to address this risk:
 - ▶ Used the screen sharing function of Microsoft Teams to evidence re-running of reports used to generate the IPE we audited; and
 - ▶ Agree IPE to scanned documents or other system screenshots.

As noted in the Audit Plan, additional risks are likely to result in additional audit fees which will be discussed with S151 officer and then submitted to PSAA for determination. Refer to section 7 of this report for more information on the audit fee.

Audit team changes

Debbie Hanson has taken over as Engagement Partner for the completion of the audit from Neil Harris. Karen Joan Cunanan, Senior Manager, has taken over from Robert Garnett

Executive Summary

Audit differences

Unadjusted audit differences

We have identified 3 audit differences which have not been adjusted for by management in the 2019/20 statement of accounts. Overall these are not material the financial statements. We are, however, required to report all unadjusted audit differences above £53k to the Audit Committee.

The unadjusted audit differences relate to:

- Inappropriate capitalisation of revenue expenditure of £153k (projected misstatement).
- Overstatement of the valuation of property, plant and equipment, £120k (judgemental misstatement).
- Errors in the Queensway lease accounting treatment resulting in an overstatement of the liability and understatement of interest expense of £232k (judgemental misstatement) as well as an understatement of the long term liability and capital contributions of £83k due to the incorrect treatment of a soft loan (factual misstatement).
- Overstatement of the recorded interest income amounting to £362k (factual misstatement).

We will seek representations from management in the management letter of representation for all unadjusted audit differences.

Total impact of the unadjusted difference in the general fund and useable reserves amounted to £283k.

Adjusted audit differences

During the audit, we identified nine audit differences which have been adjusted by management in the 2019/20 statement of accounts. The most significant of which relate to the accounting treatment of LEP funding, the valuation of the pension liability and the valuation of the Council's property assets.

Total impact of the unadjusted difference in the general fund and useable reserves amounted to £514k.

In addition, a number of disclosure differences have been identified and amended for. The most significant of which were to correct multiple financial statement disclosures for internal consistency with other financial statement disclosures.

Refer to section 3 of this report for further information on audit differences.

Executive Summary

Other reporting issues

We have reviewed the information presented in the Annual Governance Statement for consistency with our knowledge of the Council. The Annual Governance Statement has been updated to reflect the impact of the Covid-19 pandemic on the Council's arrangements. We have no matters to report as a result of this work.

Procedures required by the National Audit Office (NAO) on the Whole of Government Accounts submission for 2019/20 are no longer required based on the current timetable of the 2019/20 Whole of Government Accounts.

We have a duty under the Local Audit and Accountability Act 2014 to consider whether to report on any matter that comes to our attention in the course of the audit, either for the Council to consider it or to bring it to the attention of the public (i.e. "a report in the public interest"). We also have a duty to make written recommendations to the Council, copied to the Secretary of State, and take action in accordance with our responsibilities under the Local Audit and Accountability Act 2014. We did not identify any issues.

Other reporting matters

As the result of the audit, we have a number of observations and recommendations for the Council relating to the capacity and resilience of the Council's finance team, as well as the processes in place to support the audit.

Please refer to section 5 of this report for the detailed observations and recommendations.

Executive Summary

Audit Risks and Areas of audit focus

Our Audit Plan identified key areas of audit risk and areas of focus for our audit of the Council's financial statements. We summarise below our findings for the significant risks of the audit:

Significant risk	Findings and Conclusion
Misstatements due to fraud or error - Risk of management override	We have completed our planned audit procedures and found no indications of management override of controls.
Misstatements due to fraud or error - Inappropriate capitalisation of revenue expenditure	We have completed our planned audit procedures. Based on sample testing we have identified one projected misstatement of £153k in relation to inappropriate capitalisation of revenue expenditure. This audit difference has not been amended by management.
Misstatements due to fraud or error - Misclassification of capital receipts as revenue	We have completed our planned audit procedures. We identified that the Council incorrectly accounted for £4.1 million of Local Enterprise Partnership (LEP) funding as grant income when it should have recognised as a long term liability. This audit difference has been amended by management.
Valuation of market based property assets (including property, plant and equipment, council dwellings and investment properties)	We have completed our procedures, including review of a sample of valuations by our EY Real Estates specialist. A number of audit misstatements were identified as the result of procedures performed. Audit difference of £1.07 million have been corrected by management. However, management did not adjust for a number of the differences identified which had a net impact of £613k (understatement of property, plant and equipment balance).
Group financial statements: Valuation of Queensway asset	We have completed our procedures including a review of the Queensway asset by our EY Real Estates specialist. The valuation of the asset was outside of the reasonable expected range by £730k. This has not been corrected by management.

Executive Summary

Audit risk and areas of audit focus (continued)

Our Audit Plan identified key areas of focus for our audit of the Council's financial statements. We summarise below our findings for areas of audit focus:

Area of audit focus	Findings and Conclusion
Valuation of property, plant and equipment assets valued using the depreciated replacement cost model	We have completed our procedures, including review of the Stevenage Arts and Leisure Centre by our EY Real Estates specialist. Audit misstatements amounting to £1.1 million were identified and have been corrected for by management.
Preparation of group accounts	We have performed our audit procedures in relation to the group accounting and the scope of the group audit and have not identified any audit findings.
Queensway lease accounting treatment	We have performed our audit procedures in relation to the Queensway lease accounting and identified an audit misstatement of £232k and £83k due to the incorrect treatment of a soft loan . This misstatement has not been corrected by management. The Council should fully review its accounting model for the Queensway deal for the 2020/21 audit.
Pension liability valuation and disclosures	We have performed our audit procedures in relation to the pension liability and disclosures. As a result, we have identified an audit misstatement that decreased the pension liability recognised on the Council's balance sheet by £1.5 million. This has been amended for by management.
Recognition of grant income associated with Covid-19	We have performed our audit procedures in relation to the recognition of grant income associated with Covid-19. We have not identified any misstatements nor any instances of management bias in relation to this area.
Going concern disclosures	We have completed our procedures on going concern disclosures. We have asked management to update the disclosures which, although appropriate at the time of preparation of the draft financial statements, now need to be updated to consider the period of 12 months from the date of the audit report.

Executive Summary

Audit risk and areas of audit focus (continued)

In addition to the audit and area of focus we have identified in the Audit Plan, there are two subsequent events that were subject of our focus as these have an impact in the 2019/20 financial statements.

Area of audit focus	Findings and Conclusion
Infrastructure assets accounting	We have completed our procedures on this area. The Council has adopted the statutory instruments and CIPFA Code adaptation and infrastructure assets will now be presented at net book value in the statement of accounts.
Non-compliance with the minimum Decent Homes Standards	We have performed our audit procedures in relation to the impact of non-compliance with the minimum Decent Homes Standards in terms of the potential impact on provisions and the valuation of council dwellings. Based on the procedures performed, we are satisfied that no provision is required. We are also satisfied that the non-compliance does not have significant impact on the valuation of dwellings as the quality and condition of the housing stock has been taking into consideration in the valuation undertaken by the Council's valuer (Savills).

This report sets out our observations and conclusions, including our views on areas which might be conservative, and where there is potential risk and exposure. We report our consideration of these matters, and any others identified, in the "Areas of Audit Focus" section of this report. We ask you to review these and any other matters in this report to ensure:

- ▶ There are no other considerations or matters that could have an impact on these issues; and
- ▶ You agree with the resolution of the issues; and there are no other significant issues to be considered.

There are no matters, apart from those reported by management or disclosed in this report, which we believe should be brought to your attention.

Executive Summary

Value for money (VFM)

We have considered your arrangements to take informed decisions; deploy resources in a sustainable manner; and work with partners and other third parties. In our Audit Plan we identified a significant risk relating to financial resilience of the Council based on its lower level of available reserves compared to other local authorities in Hertfordshire, particularly in the context of the financial challenges and uncertainties being faced as the result of the Covid-19 pandemic.

We have included in Section 4 the detailed work we have performed in response to this risk.

We engaged the use of specialist support from the EY Strategy and Transactions Team to conduct scenario modelling based on the Council's medium term financial strategy. The findings of which were that the Council's medium term financial strategy was reasonable and appropriate, and that the Council has sufficient reserves over the medium term. However, it is important that the Council is not complacent regarding its reserve balances and continues with its 'Making Your Money Count' options programme to ensure its reserve balances are not reduced to unsustainable levels.

During 2022, the Council was subjected to a referral to the Housing Regulator relating to non-compliance with the minimum Decent Homes Standards in a number of areas. We have considered this in our VFM work, particularly in relation to the related governance arrangements (how the Council ensures that it makes informed decisions and properly manages its risks and improves economy, efficiency and effectiveness). Following the referral the Housing Regulator made enquiries of the Council in relation to this matter. As a result, the Council implemented a Compliance Plan and appointed Ridge & Partners (who are an experienced Professional Services consultancy practice, specialising in Housing Management), to conduct a wide ranging audit of all areas of asset compliance across all the Council's housing stock. Although there was no action required of the Council by the Housing Regulator as a result of the referral, the Council has been working actively with the Regulator, sending regular updates on the progress of the Compliance Plan they have put in place.

Considering the above and the actions implemented by the Council to address the non-compliance with the minimum Decent Homes Standards, we expect to issue an unmodified value for money conclusion.

Independence

Please refer to Section 7 for our update on Independence. There are no relationships from 1 April 2019 to the date of this report, which we consider may reasonably be thought to bear on our independence and objectivity.

Correspondence from the Public

We did not receive any formal objections and correspondence from members of the public.

Control observations

We have adopted a fully substantive audit approach, so have not tested the operation of controls.

02

Areas of Audit Focus

Areas of Audit Focus

Fraud risk - misstatements due to fraud or error

What is the risk?

The financial statements as a whole are not free of material misstatements whether caused by fraud or error.

As identified in ISA (UK) 240, management is in a unique position to perpetrate fraud because of its ability to manipulate accounting records directly or indirectly and prepare fraudulent financial statements by overriding controls that otherwise appear to be operating effectively.

We identify and respond to this fraud risk on every audit engagement.

What did we do?

We have completed our standard procedures to address the fraud risk, which included:

- ▶ Inquiring of management about risks of fraud and the controls put in place to address those risks.
- ▶ Understanding the oversight given by those charged with governance of management's processes over fraud.
- ▶ Considering the effectiveness of management's controls designed to address the risk of fraud.
- ▶ Determining an appropriate strategy to address those identified risks of fraud.
- ▶ Performing mandatory procedures regardless of specifically identified fraud risks, including:
 - ▶ Testing of journal entries and other adjustments in the preparation of the financial statements;
 - ▶ Reviewing accounting estimates for evidence of management bias; and
 - ▶ Evaluating the business rationale for significant unusual transactions.

What are our conclusions?

Our mandatory procedures did not identify any instances of management override.

Our testing of journal entry testing and have not identified any material weaknesses in controls or evidence of material management override.

We have not identified any instances of inappropriate judgements being applied.

We did not identify any other transactions during our audit which appeared unusual or outside the Council's normal course of business.

Areas of Audit Focus

Significant risk

Misstatements due to fraud or error - Incorrect capitalisation of revenue expenditure

What is the risk?

The Council is under financial pressure to achieve budget and maintain reserve balances above the minimum approved levels. Manipulating expenditure is a key way to achieve these targets.

We consider the risk applies to capitalisation of revenue expenditure. Management could manipulate revenue expenditure by incorrectly capitalising expenditure which is revenue in nature and should be charged to the comprehensive income and expenditure account.

In 2019/20 the Council incurred £43.1 million capital expenditure.

What judgements are we focused on?

We have identified a risk of expenditure misstatement due to fraud or error that could affect the income and expenditure accounts.

We consider the risk applies to capitalisation of revenue expenditure and could result in a misstatement of cost of services reported in the comprehensive income and expenditure statement.

What did we do?

Our approach focused on:

- ▶ Sampling testing capital expenditure at a lower testing threshold to verify that revenue costs have not been inappropriately capitalised;
- ▶ Examining invoices, capital expenditure authorisations, leases and other data that support capital additions. We reviewed the sample selected against the definition of capital expenditure in IAS16.
- ▶ Reviewing any unusual journal pairings related to capital expenditure posted around the year-end i.e. where the debit is to capital expenditure and the credit to income and expenditure.

What are our conclusions?

We performed extensive sample testing on the Council's capital expenditure in 2019/20.

Our sample testing of property, plant and equipment additions identified seven low value items from our representative sample (total cumulative value £985) for which the Council were unable to provide evidence to support the capital nature of the expenditure.

We have extrapolated these items to calculate a projected audit misstatement of £153,480. The Council has not adjusted the financial statements for this project misstatement. Refer to section 3 of this report.

We did not identify any usual journal entries that in relation to capital additions.

Areas of Audit Focus

Significant risk

Misstatements due to fraud or error – Misclassification of capital receipts as revenue

What is the risk?

The Council is under significant financial pressure to achieve its revenue budget and maintain reserve balances above the minimum approved levels. Manipulating expenditure is a key way of achieving these targets.

We consider the risk applies to the application and use of capital receipts in the financial statements.

The adjustments between accounting basis and funding basis under regulation changes the amounts charged to General Fund balances. Regulations are varied and complex, resulting in a risk that management misstatement accounting adjustments to manipulate the General Fund balance. We have identified the risk to be higher for adjustments concerning the application of useable capital receipts and deferred capital receipts.

What judgements are we focused on?

We have identified a specific risk of misstatements due to fraud or error that could affect the income and expenditure accounts and the balance sheet.

We consider the risk applies to the application of capital receipts in the comprehensive income and expenditure statement (CIES) and balance sheet (via the capital financing requirement).

What did we do?

Our approach focused on:

- ▶ Sample testing the application of capital receipts in the capital financing requirement to ensure they meet the definition of sources of funding;
- ▶ Sample testing deferred capital receipts to ensure any conditions have been correctly applied; and
- ▶ Using our data analytics tool to identify and test journal entries adjustments that impact capital receipts.

What are our conclusions?

Our sample testing of the application of capital receipts from in year disposal of capital assets during 2019/20 did not identify any misstatements.

There were no net material changes during the 2019/20 year to the Council's Capital Receipts Reserve and Capital Grants Unapplied account.

However, we identified a material misstatement in relation to accounting treatment adopted for Local Enterprise Partnership (LEP) funding of capital projects in relation to the regeneration of Stevenage town centre. The Council incorrectly accounted for £4.1 million of LEP funding received in year as grant income whereas it should have been accounted for as long term borrowing based on the underlying nature of the LEP agreements.

This increased the Council's Capital Financing Requirement. The Council has amended the financial statements to adjust for the LEP misstatement. Refer to section 3 of this report.

Areas of Audit Focus

Significant risk

Valuation of market based property assets (including property, plant and equipment (PPE), council dwellings and investment properties)

What is the risk?

The Royal Institute of Chartered Surveyors (RICS), the body setting the standards for property valuations, issued guidance to valuers highlighting that the uncertain impact of Covid-19 on markets might cause a valuer to conclude that there is a material uncertainty. Caveats around this material uncertainty have been included in the year-end valuation reports produced by the Council's external valuers.

We consider that the material uncertainties disclosed by the valuer gave rise to an additional risk relating to disclosures on the valuation of market based properties. In addition, outputs from the valuer are subject to estimation. There is therefore a significant risk that the valuation of market based property assets may be misstated.

The Council has as significant asset base including:

- £632 million of council dwellings,
- £163 million of property, plant and equipment,
- £24 million of investment properties.

What judgements are we focused on?

We have identified a specific risk of misstatements that could affect the balance sheet.

We consider the risk applies to the valuation of market based property assets, including PPE, council dwellings and investment properties.

ISAs 500 and 540 require us to undertake procedures on the use of experts and assumptions underlying fair value estimates.

What did we do?

Our approach focused on:

- ▶ The adequacy of the scope of the work performed by the Council's valuers, their professional capabilities and the results of their work;
- ▶ The use of EY valuation specialists to review a sample of market based property assets valuations
- ▶ Sample testing property values to corroborate key assumptions used by the valuer in performing their valuations;
- ▶ Reviewing assets not subject to valuation in 2019/20 to confirm that the asset base not valued is not materially misstated;
- ▶ Consideration of useful economic lives in the most recent valuation; and
- ▶ Testing that accounting entries had been correctly processed in the financial statements.

Areas of Audit Focus

Significant risk

Valuation of market based property assets

What are our conclusions?

Our consideration of the work, professional capabilities and the results of the Council's valuers did not identify any issues.

Our detailed testing did however identify a number of misstatements as summarised below:

Property, plant and equipment:

- Based on the review conducted by the EY Real Estate valuations team, we identified four properties, from a sample of 8, where the valuation of the asset was outside the reasonable expected range calculated by our experts. This resulted in an audit misstatement of £1.07 million understatement of the value of property, plant and equipment in relation to two assets. This misstatement was amended for by management.
- A further audit misstatement of £120k was identified based on the net cumulative impact of differences identified in relation to a further five property valuations. This misstatement was not amended for by management.
- In addition, a number of assets, total value £1.2 million, were identified that were last valued in 2012. This is outside the accounting framework's requirement of a valuation at least once every 5 years. Based on audit challenge, management revalued a number of these assets, which resulted in a further audit adjustment of £517k which increased the valuation of PPE. The statements of accounts has been amended to reflect the adjustments.

Council dwellings

- Council dwellings valuations was understated by £609k due to the incorrect valuation figure being from the valuer's report. This has been corrected for by management.

Investment properties

- The assumptions used in valuation of investment properties were overall reasonable. No audit misstatements were identified in relation to investment property valuations.

Other findings

- Our consideration of the useful economic lives in the most recent valuation did not identify any issues.
- Accounting entries had been correctly disclosed in the financial statements.

Refer to section 3 of this report for information on audit misstatements.

Areas of Audit Focus

Significant risk

Group financial statements: Valuation of Queensway asset

What is the risk?

The valuation of the Queensway asset is material to the Council's group financial statements. This asset is a regeneration asset with commercial activities in Stevenage town centre that was undergoing regeneration as of 31 March 2020. The valuation of this asset is based on future expected cash flows that Queensway LLP will receive from its tenants. As the asset is undergoing regeneration, and the economic environment is uncertain as a result of the COVID-19 pandemic, there are an increased number of assumptions and estimates that underpin the valuation of this asset. As such, the valuation of this asset in particular is susceptible to material misstatement.

The value of the Queensway asset recognised in the Council's group financial statements is £11.73 million.

What judgements are we focused on?

The valuation assumptions used to value the Queensway asset as of 31 March 2020.

What did we do?

Our approach focused on:

- ▶ The adequacy of the scope of the work performed by the Council's valuers, their professional capabilities and the results of their work;
- ▶ The use of EY valuation specialists to review the valuation of the Queensway asset. This included testing and challenging the key asset information and assumptions used by the valuers in performing their valuation; for example referencing tenancy schedules back to tenancy agreements;
- ▶ Considering any specific changes to asset that have occurred and that these have been communicated to the valuer;
- ▶ Testing that accounting entries had been correctly processed in the financial statements.

What are our conclusions?

Our consideration of the work, professional capabilities and the results of the Council's valuers did not identify any issues.

Based on the review conducted by the EY Real Estate valuations team we considered that a reasonable valuation range for the Queensway asset as of 31 March 2020 was between £10 million and £11 million. The value of asset in the Council's accounts was £730k above the maximum reasonable range we calculated. In particular, the market rent assumptions used by the Council's valuer were above those that could reasonably be expected.

We have treated the £730k difference as a judgemental audit misstatement. This has not been adjusted for by management. (This unadjusted audit difference is included within the £120k net remaining difference on property valuations, as referred to section 3 of this report).

Accounting entries had been correctly disclosed in the financial statements.

Audit risks

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Valuation of property, plant and equipment assets under depreciated replacement cost model - inherent risk

Property, plant and equipment (PPE) represents a significant balance in the Council's accounts and are subject to valuation changes, impairment reviews and depreciation charges.

Material judgemental inputs and estimation techniques are required to calculate the year-end PPE balances held in the balance sheet. For assets valued using depreciated replacement cost (DRC) this risk is heightened due to the specialised nature of the assets and insufficient availability of market-based evidence to assist the valuation.

As the Council's DRC asset base is significant (£23.3 million as of 31 March 2020), and the outputs from the valuer are subject to estimation, there is a higher inherent risk that the valuation of these assets may be under/overstated or the associated accounting entries incorrectly posted.

What did we do?

We have:

- ▶ Considered the work performed by the Council's valuers, including the adequacy of the scope of the work performed, their professional capabilities and the results of their work;
- ▶ Engaged EY Real Estate valuations team to review the Council highest value asset £14.4 million (Arts and Leisure Centre)
- ▶ Sample tested key asset information used by the valuers in performing their valuation (e.g. floor plans to support valuations based on price per square metre);
- ▶ Tested accounting entries, ensuring these have been correctly processed in the financial statements.

Our conclusions are:

Our consideration of the work, professional capabilities and the results of the Council's valuers did not identify any issues.

Based on the review conducted by EY Real Estate valuations team, the valuation of the Arts and Leisure Centre at £14.4 million was within a reasonable valuation range.

An audit misstatement relating to a judgemental understatement in the valuation of Stevenage Swimming Pool of £822k was identified by the testing undertaken by the audit team. This misstatement has not been adjusted for by management (This unadjusted audit difference is included within the £120k net remaining difference on property valuations, as referred to section 3 of this report).

Appropriate accounting entries have been adopted within the financial statements for valuations of property, plant and equipment.

Audit risks

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Preparation of group accounts - inherent risk

Queensway LLP was formed by Stevenage Borough Council in November 2018 as an entity to facilitate the regeneration of the Queensway asset that is an integral part of the Council's town centre regeneration strategy.

During the 2018/19 audit, we considered the preparation of group accounts as a significant risk for the audit as it was the first time that Queensway LLP was consolidated into the group financial statements.

There were no significant issues arising from the Council's group accounts consolidation. However, as 2019/20 is the first full financial year for Queensway LLP, we still consider the risk relating to the preparation of group accounts and our group audit procedures to be an inherent risk.

What did we do?

We have:

- ▶ Enquired with management to understand the processes and controls in place for how intra-group transactions and balances are identified.
- ▶ Substantively tested the group consolidation schedule to review whether the adjustments made are consistent with our knowledge gained throughout the audit of the Stevenage Borough Council and of Queensway LLP.
- ▶ Reviewed the group financial statements and consolidation schedule to consider whether the adjustments made are compliant with the applicable accounting standards, including IFRS 10 Consolidated Financial Statements and the CIPFA Code of Practice.

Our conclusions are:

The processes and controls in place for the identification of intra-group transactions and balances are appropriate.

Substantive testing on the group consolidation of Queensway LLP accounts into the Council's group financial statements did not identify any misstatements.

Consolidation adjustments made by the Council are compliant with the CIPFA Code and IFRS 10.

Audit risks

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Queensway lease accounting treatment - inherent risk

In preparing Queensway LLP financial statements significant judgements are taken in relation to the lease accounting treatment.

We reviewed these judgements during the 2018/19 audit and a number of amendments were made to the group financial statements as a result of the audit.

As 2019/20 is the first full financial year of operation for Queensway LLP, we need to consider whether these judgements remain appropriate.

What did we do?

We have:

- ▶ Reviewed the lease accounting treatment adopted during 2019/20; including following up on points identified during the 2018/19 review of the lease accounting treatment. In particular, the interest rates applied to the leasing and borrowing elements of the lease agreement.
- ▶ Considered whether the appropriate accounting journal entries are consistent with the prevailing accounting standard IAS 17 Leases.
- ▶ Reviewed the relevant lease disclosures in the Council's financial statements.

Our conclusions are:

Based on findings in the 2018/19 audit, the Council has amend its Queensway lease and borrowing model to revise the interest rate adopted on the borrowing element of the Queensway deal. However, the interest rate calculated by the Council is not correct due to the incorrect split of lease repayment amounts between repayment of principal and repayment of interest in the model.

The impact of this difference for the Council's 2019/20 group financial statements is that the long term lease liability on the balance sheet is overstated by £175k and the interest cost, recognised in the comprehensive income and expenditure statement, is also overstated by £175k. We have treated this as an audit misstatement that has not been corrected for by management. Refer to section 3 of this report for further information.

We recommend that the Council's reviews in totality the Queensway lease and borrowing model for 2020/21. This may require the Council to draw upon external specialist accounting advice. Each year this matter remains unresolved the audit misstatement will increase and will become material to the audit.

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?	What did we do?
<p>Pension liability valuation and disclosures - inherent risk</p> <p>The Local Authority Accounting Code of Practice and IAS19 require the Council to make extensive disclosures within its financial statements regarding the Local Government Pension Scheme (LGPS) in which it is an admitted body. The Council's current pension fund deficit is a material and sensitive item and the Code requires that this liability be disclosed on the Council's balance sheet.</p> <p>The Council's pension fund deficit is a material estimated balance and the Code requires that this liability be disclosed on the Council's balance sheet. At 31st March 2020, this totalled £39 million.</p> <p>The information disclosed is based on the IAS 19 report issued to the Council by the Actuary. Accounting for this scheme involves significant estimation and judgement and due to the nature, volume and size of the transactions, in the current uncertain economic environment, we consider this to be a higher inherent risk. In addition, every three years, a formal valuation of the whole fund is carried out in accordance with the LGPS Regulations 2013 to assess and examine the ongoing financial position of the fund. The IAS19 report for 2019/20 will reflect the updated membership numbers provided for this triennial valuation. We will therefore need to seek additional assurances from the Pension Fund auditor over this data.</p> <p>An additional consideration in 2019/20 will be the impact of Covid-19 on the valuation of complex (Level 3) investments held by Hertfordshire Pension Fund, for example private equity investments where valuations as at 31 March 2020 will have to be estimated. This is likely to impact on the IAS19 reports provided by the actuary and the assurances over asset values that are provided by the pension fund auditor, and consequently the assurance we are able to obtain over the net pension liability in the Council's accounts.</p>	<p>We have:</p> <ul style="list-style-type: none"> ▶ Liaised with the auditors of Hertfordshire Pension Fund, to obtain assurances over the information supplied to the actuary in relation to Stevenage Borough Council; ▶ Assessed the work of the Pension Fund actuary including the assumptions they have used by relying on the work of PWC - Consulting Actuaries commissioned by the National Audit Office for all Local Government sector auditors, and considering reviews of this by the EY actuarial team; and ▶ Reviewed and test the accounting entries and disclosures made within the Council's financial statements in relation to IAS19. ▶ Assessed the results of the triennial valuations, including the assumptions used and the impact on the Council's pension liability. ▶ Engaged early with the Council, and their actuary, to understand any ongoing impact of the McCloud judgement and GMP rulings on the IAS19 liability. ▶ Considered the nature and value of level 3 investments held by Hertfordshire Pension Fund and the proportion of the overall Fund relating to Stevenage Borough Council in order to identify any additional procedures required to support the estimates of the valuation of these asset as at 31 March 2020. <p><u>Our conclusions are:</u></p> <p>We received the Pension Fund Assurance letter from the auditors of Hertfordshire Pension Fund. This highlighted that the investment return for the year end 31 March 2020 as estimated by the actuary was different to that reported by the Pension Fund (-3% estimate compared to -1.3% actual). SBC share amounted to £612k. A revised IAS 19 results report was obtained by the Council from the actuary to update for this.</p> <p>In addition, the audit of the pension investments held by the Pension Fund identified valuation misstatements of which the Council has a share.</p> <p>In total, the value of the Council's pension liability on the balance sheet decreased from £40.9 million to £39.4 million as the result of audit adjustments to the financial statements. Refer to section 3 of this report for further information.</p> <p>The accounting entries and pension liability related disclosures in the financial statements were appropriate.</p>

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Recognition of grant income associated with Covid-19

The Council has received additional funding in the form of grants as a result of the Covid-19. There is the potential for the recognition and treatment of these grants (including business rate related grants) to be manipulated to improve the reported position.

What did we do?

We have:

- ▶ Considered the revenue and capital grants received by the Council;
- ▶ Assessed the potential for manipulation of individual grant streams (including those related to business rates); and
- ▶ Responsive to the risk, carry out testing to ensure the accounting treatment and recognition applied to grant income is appropriate.

Our conclusions are:

The Council did not receive a material amount of Covid-19 support funding for itself in the 2019/20 year, as Covid did not have a significant impact until March 2020.

The Council did however receive Covid-19 business support funding to provide financial support to the local businesses of Stevenage in March 2020. Based on our substantive testing on cut-off around the financial year end we did not identify any instances of inappropriate recognition this money in the Council's financial statements.

Based on the grant testing performed during the audit we did not identify any management bias in relation to recognition of grant income related to Covid-19

Audit risks

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Going concern disclosures

The auditor's report in respect of going concern covers a 12-month period from the date of the audit report. Therefore the Council's assessment and financial statement going concern disclosures need to cover this future prospective period.

CIPFA's Code of Practice on Local Authority Accounting in the United Kingdom 2019/20 sets out that organisations that can only be discontinued under statutory prescription shall prepare their accounts on a going concern basis.

However, International Auditing Standard 570 *Going Concern*, as applied by Practice Note 10: *Audit of financial statements of public sector bodies in the United Kingdom*, still requires auditors to undertake sufficient and appropriate audit procedures to consider whether there is a material uncertainty on going concern that requires reporting by management within the financial statements, and within the auditor's report. We are obliged to report on such matters within the section of our audit report 'Conclusions relating to Going Concern'.

Covid-19 has created a number of financial pressures throughout Local Government. For Stevenage Borough Council the estimated cumulative loss as the result of Covid-19 through to March 2023 is approximately £10 million. This includes significant reductions in income for the Council from car parks, business rate gains and other income; as well as additional cost pressures to accommodate the homeless. Financial support from Central Government does not cover all of the Council's losses.

What did we do?

We have:

Obtained, reviewed the assessment management's going concern assessment, focusing on the reasonableness of the financial impact assessment, cashflow and liquidity forecasts, known outcomes, sensitivities, mitigating actions and key assumptions, including around reductions in fees and charges.

Considered the adequacy of the revised disclosure note and its consistency with the going concern assessment and our audit procedures.

Our conclusions are:

Officers have carried out an assessment of the impact of Covid-19 on the Council's income, expenditure, balances and reserves to inform reporting to the Audit Committee and other members. These assessments have been used to enhance the disclosure in the financial statements around the going concern assertion.

The Council's cash flow modelling through to March 2024 demonstrates that it is able to work within its capital financing requirement. The Council is forecasting a liquidity position of cash and short term investment balances of £59 million as of 31 March 2024.

We have reviewed the revised going concern disclosure and are satisfied that it adequately reflects the Council's assessment and informs the reader of the impact of the Covid-19 pandemic on the Council's finances.

We have however asked management to update the disclosures which, although appropriate at the time of preparation of the draft financial statements, now need to be updated to consider the period of 12 months from the date of the audit report (i.e. to March 2024).

Audit risks

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Infrastructure assets

In March 2022, an issue was raised with the National Audit Office's Local Government technical network in relation to the accounting for infrastructure assets which are held at depreciated historic cost. Following more detailed consideration, it was identified that although local authorities add expenditure incurred on replacing or enhancing such assets, most do not appear to be considering the Cipfa Code requirement to establish whether this spend is a replacement of an asset, or a recognised component, and therefore are not derecognising the old asset or component. As a consequence, the gross cost and gross accumulated depreciation are continually increasing and the notes to the financial statements may be misstated where the expenditure is a replacement for an asset/component that is not fully depreciated.

Cipfa established a task and finish group to address this issue. The Department to Levelling Up, Housing and Communities (DLUHC) and Cipfa have worked on a sector wide approach to resolution of the reporting of infrastructure assets. Following consultations with FRAB, local councils, ICAEW and external audit firms, a resolution has been agreed which has two elements:

- 1) Cipfa have issued an adaptation to the Code of Practice on Local Authority Accounting.
- 2) DLUHC have issued a Statutory Instrument (SI) (The Local Authorities (Capital Finance and Accounting) (England) (Amendment) Regulations 2022).

The Code allows for infrastructure assets to be reported in the notes to the accounts on a net basis. The SI allows for the infrastructure assets opening balance to be brought forward without amendment and determines the carrying amount to be derecognised in respect of replaced components to be nil.

The Council plans to apply both the Code adaptation and SI to the 2019/20 financial statements.

As at 31 March 2020, infrastructure assets were reported with a gross cost of £8.8 million and accumulated depreciation and impairment of £4.2 million.

What did we do?

We have:

- ▶ Agreed the opening balance for infrastructure assets to the closing balance on the prior year audited financial statements.
- ▶ Tested in year additions of infrastructure assets to ensure they are supported and correctly reflected in the accounts.
- ▶ Performed a reasonableness check to determine whether the economic useful lives used by management to calculate depreciation were appropriate and obtain an understanding of how these had been determined.
- ▶ Compared the depreciation charge included in the financial statements to an estimated depreciation charge using the CIPFA example useful economic lives.
- ▶ Reviewed updated accounting disclosure to ensure they are in line with the requirement of amended CIPFA code of practice and accurately reflected the Council's practices.

Findings and conclusion:

The Council has adopted the statutory instruments and CIPFA Code adaptation. The infrastructure assets of the Council will be presented at net book value in the amended statement of accounts.

Our testing of additions, derecognitions and depreciation did not identify any significant differences.

Other areas of audit focus

We have identified other areas of the audit, that have not been classified as significant risks, but are still important when considering the risks of material misstatement to the financial statements and disclosures.

What is the risk/area of focus?

Non-compliance with minimum Decent Homes Standards

In 2022, the Council was subject to a referral to the Housing Regulator in relation to non-compliance with the minimum decent home standards in a number of areas. The Council has been working with the regulator since the referral was made and has received a response to the action plan they have put in place to address the areas of non-compliance identified.

We have considered the impact of the non-compliance in the following areas:

- Valuation of the council's dwellings
- Provisions

What did we do?

We have:

Valuation of council dwellings:

- ▶ Obtained confirmation from Savills (Council's valuer) regarding how the quality of dwellings has been considered in their valuations.
- ▶ Confirmed the date of the last physical inspection of the council dwellings which is February 2020
- ▶ Obtained input from our internal valuers to assess the reasonableness of the responses of the valuer

Provisions:

- ▶ Considered the requirements of CIPFA Code of Practice on Local Authority Accounting
- ▶ Obtained 2019/20 Local Authority Housing Standard return and reviewed the costs to bring council dwellings that do not meet the decent home criteria up to standard
- ▶ Assessed whether the related cost are revenue or capital in nature.

Findings and conclusion:

Based on the procedures performed, the non-compliance does not have significant impact on the valuation of dwellings, as the quality and condition of the stocks have been considered in the valuation undertaken by the Council's valuer (Savills).

In addition, no provision is required as the cost to bring dwellings that do not meet the decent home criteria up to standard are largely capital in nature.

03 Audit Differences

Audit Differences

In the normal course of any audit, we identify misstatements between amounts we believe should be recorded in the financial statements and the disclosures and amounts actually recorded. These differences are classified as “known” or “judgemental”. Known differences represent items that can be accurately quantified and relate to a definite set of facts or circumstances. Judgemental differences generally involve estimation and relate to facts or circumstances that are uncertain or open to interpretation.

Summary of unadjusted audit differences

The following audit differences, above our reporting threshold of £52,777, have not been amended for by management in the 2019/20 statement of accounts:

- Inappropriate capitalisation of revenue expenditure - Based on testing of a representative sample of capital additions we have identified a small number of errors which we have extrapolated to calculate a misstatement of £153k, which overstates the balance of property, plant and equipment and understates the Council’s revenue expenditure. This unadjusted misstatement would impact the Council’s useable general fund balance.
- Valuation of property, plant and equipment - Differences were identified on the valuation of individual properties, these ranged from £822k overvalued to £733k undervalued. This differences are as the result of the underlying methodology and assumptions used by the Council’s valuer. The total net cumulative impact of unadjusted differences in relation to property valuations that we are reporting is £120k. This misstatement overstates the balance of Council’s property, plant and equipment and of the Council’s revaluation reserve (an unusable reserve) by £120k.
- Queensway lease accounting treatment - Based on our review procedures of the Queensway lease and borrowing models we have identified an audit difference of £232k which overstates both the long term lease liability on the Council’s balance sheet and also the interest cost recognised as expenditure. In addition, an understatement of the long term liability and capital contributions of £83k due to the incorrect treatment of a soft loan.
- Interest income - Overstatement of the recorded interest income amounting to £362k

Audit Differences

Summary of adjusted audit differences

In total there were 9 audit adjustments that have been amended for by management in the 2019/20 statement of accounts. We report to the Audit Committee significant audit differences (above our performance materiality threshold of £0.792 million) that have been amended for in the financial statements. The significant audit differences that have been adjusted for include:

- Accounting treatment of Local Enterprise Partnership (LEP) funding for capital regeneration scheme in Stevenage. The Council has applied the incorrect accounting treatment to LEP funding. The Council has multiple LEP funding agreements, some of which are non-repayable and some of which are repayable. The repayable funding should be accounted for as borrowing. In addition, the Council had not considered the soft-loan element of the borrowing. Furthermore, the Council accrued £1.3 million of LEP funding as a debtor at year end. However the nature of this funding was actually borrowing and it is not standard accounting practice to accrued for borrowing before it is received.
- The total audit adjustment in relation to LEP funding was:
 - Grant income received in year decreased by £4.1 million
 - Long term liabilities increased by £3.2 million
 - Receivables (debtors) decreased by £1.3 million
 - Capital adjustment account (unusable reserve) increase by £0.4 million (Soft-loan element)
- Pension liability - The valuation of the pension liability decreased by £1.56 million as the result of the revised IAS19 report from the actuary and the findings from the audit of Hertfordshire Pension Fund, in relation to the valuation of investment assets held by the Pension Fund. This adjustment decreased both the pension liability and the pension reserve (unusable reserve) by £1.56 million. This had no impact on the Council's usable reserves for 2019/20.
- Property, plant and equipment valuations - Differences in relation to the valuation of properties asset were identified that increased both the value of the property, plant and equipment and the revaluation reserve (unusable reserve) by £1.07 million. This had no impact on the Council's usable reserves for 2019/20.

Other audit differences that were above our reporting threshold of £0.053 million for unadjusted differences, but below our performance materiality threshold of £0.792 million which have been amended for in the 2019/20 statement of accounts include the following areas:

- Valuation of council dwelling properties.
- PPE additions that had not been accrued for as well as PPE additions that had been inappropriately accrued for.
- Over and under measurement of revenue expenditure accruals.
- Omitted journal entry postings in relation to NNDR income for the Council.

In addition there were numerous disclosure misstatements in the draft 2019/20 statement of accounts that have been corrected for. The significant disclosure differences adjustment for were:

- Clerical casting errors and internal inconsistencies between disclosures in the financial statements.
- Disclosures in the draft statement of accounts itself that had not been updated since the prior year accounts.
- Errors in the classification of cash flows in the Statement of Cash Flows in relation to the LEP funding adjustment.

04 Value for Money Risks

Value for Money

Background

We are required to consider whether the Council has put in place 'proper arrangements' to secure economy, efficiency and effectiveness on its use of resources. This is known as our value for money conclusion.

For 2019/20 this is based on the overall evaluation criterion:

"In all significant respects, the audited body had proper arrangements to ensure it took properly informed decisions and deployed resources to achieve planned and sustainable outcomes for taxpayers and local people"

Proper arrangements are defined by statutory guidance issued by the National Audit Office. They comprise your arrangements to:

- Take informed decisions;
- Deploy resources in a sustainable manner; and
- Work with partners and other third parties.

In considering your proper arrangements, we will draw on the requirements of the CIPFA/SOLACE framework for local government to ensure that our assessment is made against a framework that you are already required to have in place and to report on through documents such as your annual governance statement.

Impact of covid-19 on our Value for Money assessment

On 16 April 2020, the National Audit Office published an update to auditor guidance in relation to the 2019/20 Value for Money assessment in the light of Covid-19. This clarified that in undertaking the 2019/20 Value for Money assessment auditors should consider Local Authorities' response to Covid-19 only as far as it relates to the 2019/20 financial year; only where clear evidence comes to the auditor's attention of a significant failure in arrangements as a result of Covid-19 during the financial year, would it be appropriate to recognise a significant risk in relation to the 2019/20 VFM arrangements conclusion.

Overall conclusion

Our audit procedures on your arrangements to secure economy, efficiency and effectiveness in your use of resources as substantially complete and are subject to final Partner review.

We identified one significant risk in relation to the Council's arrangements at the planning stage in relation to financial resilience. The table below presents our findings in response to this risk as well as one additional risk identified during the course of our audit. We did not identify any additional risks as a result of Covid.

We have no other matters to report about your arrangements to secure economy, efficiency and effectiveness in your use of resources and expect to issue an unqualified vfm conclusion.

Value for Money Risk

We are only required to determine whether there are any risks that we consider significant within the Code of Audit Practice, where risk is defined as:

“A matter is significant if, in the auditor’s professional view, it is reasonable to conclude that the matter would be of interest to the audited body or the wider public”

Our risk assessment supports the planning of enough work to deliver a safe conclusion on your arrangements to secure value for money, and enables us to determine the nature and extent of any further work needed. If we do not identify a significant risk we do not need to carry out further work.

The table below presents the findings of our work in response to the risks areas in our Audit Planning Report as well as any additional risks identified since then.

What is the significant value for money risk?	What arrangements did the risk affect?	What did we do?
<p>Financial resilience</p> <p>The Council is operating in a challenging financial environment with reduced income and increased costs pressures as a result of Covid-19. The Council had estimated this increased financial pressure to be £6.1 million for the initial 6 month period of Covid; However given the unprecedented circumstances there was significant uncertainty surrounding the type and duration of social distancing measures that will be in place as a result of Covid-19, and the resulting financial impact this has on the Council.</p> <p>The September 2019 Medium Term Financial Strategy (MTFS), identified £1.9 million of Financial Security targets to be achieved by 2022/23; as well as an additional increase of the saving targets of £135,000 which was yet to be identified (effectively a budget gap). Delivery of the Financial Security Targets is critical for the Council to sustainably deploy its resources in the medium term. This represents a significant risk to the Council’s overall financial resilience.</p> <p>Stevenage Borough Council has a lower level of reserves available to it compared to other local authorities in Hertfordshire. This is due to the Council’s planned use of resources over the medium term as set out in their MTFS. The Council risk assesses its required minimum level of reserves for both the general fund and the housing revenue account.</p> <p>The Council will be revisiting its budget and MTFS assumptions in light of Covid-19. The Council’s revised MTFS was presented at the June 2020 Executive meeting.</p>	<ul style="list-style-type: none"> Deploying resources in a sustainable manner. 	<p>To address this risk, we engaged specialist support from EY’s Strategy and Transactions team to work with the audit team in reviewing, challenging and exercising appropriate professional scepticism on the Council’s medium-term financial strategy, including:</p> <ul style="list-style-type: none"> Identification of the key assumptions contained in the medium-term financial plan and the reasonableness of the basis of these; Review of the Council’s stress testing of these assumptions; sensitivity analysis and mitigating actions. Developing an understanding of how the Council identifies its budget gaps and risk mitigations; Stress tested the Council’s financial resilience and adequacy of available reserves and balances before and in light of Covid-19. Assessing the Council’s track record on delivering savings and the robustness of its future savings plans. Reviewing the process by which the Council risk assesses its minimum required level of reserves. <p>Our findings and conclusions in relation to this value for money risk are on the next page:</p>

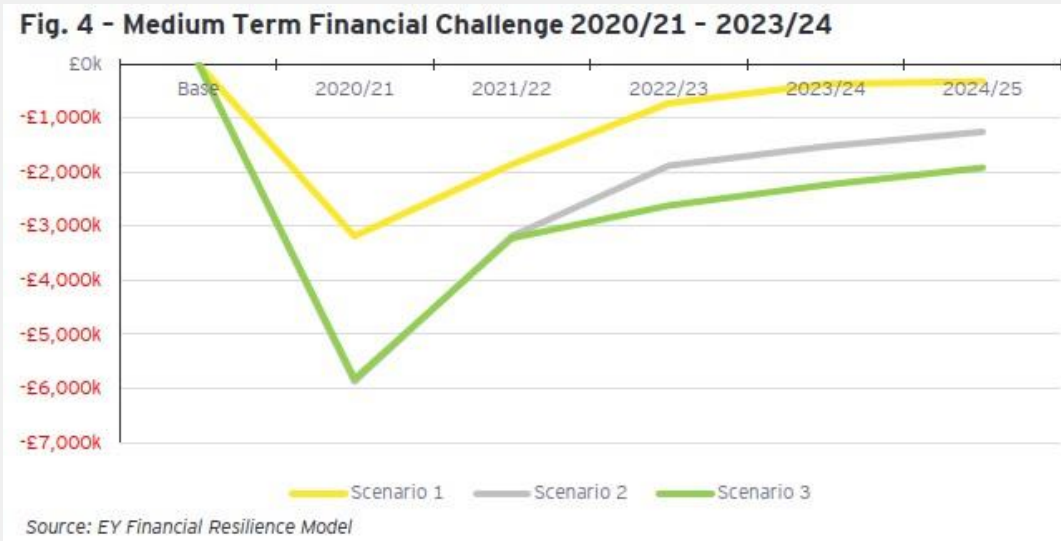

Value for Money Risk (continued)

What are our findings and conclusion?

Findings:

Modelling undertaken by our Strategy and Transactions team suggests that the Council's forecasts within the 2020/21 financial year and over the medium-term financial strategy are both reasonable and appropriate compared with our base-case economic scenario, including the likely impacts of Covid-19 on the Council's finances. Our modelling of the the financial challenges that the Council faces over the medium is forecast is however considerably more severe in our more volatile economic conditions scenario (scenario 3 in the table below).

Our modelling suggests that over the medium term the Council has sufficient reserve balances to meet the financial challenges of the base-case economic scenario. However, it is important that the Council is not complacent regarding its reserve balances and continues with its 'Making Your Money Count' options programme so that reserve balances are not reduced to un sustainable levels.

The Council's planned use of resources over the medium term is set out in their medium term financial strategy. The Council risk assessment of its required minimum level of reserves is appropriate based on the Council's risk appetite and future planned use of resources for the people of Stevenage.

Overall conclusion:

We are satisfied that the Council's arrangements to ensure financial resilience are adequate for 2019/20. We would however recommend that the Council continues with its 'Making Your Money Count' options programme and ensures its reserve balances is maintained at an appropriate level.

Value for Money Risk (continued)

Other VFM Considerations

Compliance with Minimum Decent Homes Standards

Finding

During 2022, the Council was subjected to a referral to the Housing Regulator relating to non-compliance with the minimum Decent Homes Standards in a number of areas. We have considered this in our VFM work particularly, in relation to the governance arrangements (how the Council ensures that it makes informed decisions and properly manages its risks and improves economy, efficiency and effectiveness).

Following the referral the Housing Regulator made enquiries of the Council in relation to this matter. As a result, the Council implemented a Compliance Plan and appointed Ridge & Partners (who are an experienced Professional Services consultancy practice, specialising in Housing Management), to conduct a wide ranging audit of all areas of asset compliance across all the Council's housing stock. Although there was no action required of the Council by the Housing Regulator as a result of the referral, the Council has been working actively with the Regulator, sending regular updates on the progress of the Compliance Plan they have put in place.

Conclusion

Considering the above and the actions implemented by the Council to address the non-compliance with the minimum Decent Homes Standards, we have not identified significant risk in relation to this issue as the Council has taken appropriate action upon enquiry from the Housing Regulator.

We would however recommend that the Council should continue to closely monitor the implementation and monitoring of its compliance plans and ensure that robust arrangements are put in place to ensure compliance with the standards are in place for future years.

05 Other reporting issues

Other reporting issues

Other reporting issues

Consistency of other information published with the financial statements, including the Annual Governance Statement

We must give an opinion on the consistency of the financial and non-financial information in the Statement of Accounts 2019/20 with the audited financial statements.

We must also review the Annual Governance Statement for completeness of disclosures, consistency with other information from our work, and whether it complies with relevant guidance.

Financial information in the Statement of Accounts 2019/20 and published with the financial statements was consistent with the audited financial statements.

We have reviewed the Annual Governance Statement and can confirm it is consistent with other information from our audit of the financial statements and we have no other matters to report.

Whole of Government Accounts

Alongside our work on the financial statements, we also review and report to the National Audit Office on your Whole of Government Accounts return. The extent of our review, and the nature of our report, is specified by the National Audit Office.

Procedures required by the National Audit Office (NAO) on the Whole of Government Accounts submission for 2019/20 are no longer required based on the current timetable of the 2019/20 Whole of Government Accounts.

Other reporting issues

Other reporting issues

Other powers and duties

We have a duty under the Local Audit and Accountability Act 2014 to consider whether to report on any matter that comes to our attention in the course of the audit, either for the Council to consider it or to bring it to the attention of the public (i.e. “a report in the public interest”). We did not identify any issues which required us to issue a report in the public interest.

We also have a duty to make written recommendations to the Council, copied to the Secretary of State, and take action in accordance with our responsibilities under the Local Audit and Accountability Act 2014. We did not identify any issues.

Other matters

As required by ISA (UK&I) 260 and other ISAs specifying communication requirements, we must tell you significant findings from the audit and other matters if they are significant to your oversight of the Council’s financial reporting process. They include the following:

- Significant qualitative aspects of accounting practices including accounting policies, accounting estimates and financial statement disclosures;
- Any significant difficulties encountered during the audit;
- Any significant matters arising from the audit that were discussed with management;
- Written representations we have requested;
- Expected modifications to the audit report;
- Any other matters significant to overseeing the financial reporting process;
- Findings and issues around the opening balance on initial audits (if applicable);
- Related parties;
- External confirmations;
- Going concern; and
- Consideration of laws and regulations.

We have made the several observations and recommendations as the result of the 2019/20 audit, please refer to the next page.

Other than the observations and recommendations (as stated on the next page) we have no other matters to report.

Other reporting issues

Other matters

Observations and recommendations resulting from the 2019/20 audit

As the result of the 2019/20 audit, we have made the following observations on the capacity and resilience of the Council's finance team, as well as the processes in place for the Council to be prepared for the audit:

- The capacity and resilience of the Council's finance team should be reviewed to consider if there is sufficient capacity for the Council to proactively consider the financial reporting implications; whether a change in accounting standard or a new source of funding or major Council project. For example, if the accounting treatment of the LEP funding had been proactively considered by the Council in advance of the audit, then the time taken to complete the audit would have been reduced. There is a risk of similar occurrences in future years without sufficient capacity in the Council's finance team.
- The quality of the Council's working papers to support the audit of its financial statements should be improved. The Council's working papers for the audit were often difficult and time consuming to understand. This increases the risk of errors as well as the risk of the audit overrunning and resulting in higher audit fees for the Council.
- The Council's financial reporting processes for its capital assets (property, plant and equipment and investment properties) should be reviewed to identify potential efficiencies. The Council's current process for reporting the value of its capital asset is very manual and requires multiple adjustments to be made from the fixed asset register system (RAM). This is time consuming for both the Council's officers to prepare and for the audit team to review. There may be improved technological and automated processes available. There is a risk that the reporting and audit of the Council's capital assets is more complicated, time consuming and costly than necessary. There is also an increased risk of error due to the level of manual processes.
- The Council should review the Queensway lease and borrowing accounting models. This may require the Council to draw upon external specialist accounting advice. The methodology and calculations used in the model are likely to result in a material misstatement in the Council's financial statements at a future point in time.

We note that the Council has already taken positive steps to address the observations and recommendations noted above in advance of the succeeding audits, including recruitment of permanent posts for Technical Finance Manager and Associate Director for Finance. In addition, the Council is reviewing its working papers to support the financial statements in advance of the succeeding audits.

06

Assessment of Control Environment

Assessment of Control Environment

Financial controls

It is the responsibility of the Council to develop and implement systems of internal financial control and to put in place proper arrangements to monitor their adequacy and effectiveness in practice. Our responsibility as your auditor is to consider whether the Council has put adequate arrangements in place to satisfy itself that the systems of internal financial control are both adequate and effective in practice.

As part of our audit of the financial statements, we obtained an understanding of internal control sufficient to plan our audit and determine the nature, timing and extent of testing performed. As we have adopted a fully substantive approach, we have therefore not tested the operation of controls.

Although our audit was not designed to express an opinion on the effectiveness of internal control we are required to communicate to you significant deficiencies in internal control.

We have not identified any significant deficiencies in the design or operation of an internal control that might result in a material misstatement in your 2019/20 financial statements of which you are not aware.

Commentary for 2020/21 financial statements and audit:

During the 2021 calendar year, there was considerable turnover of key finance officers at Stevenage Borough Council. While this does not directly impact the control environment in place during the 2019/20 financial year, it does raise questions on the effectiveness of the internal control environment at the Council to prevent and detect material misstatements for the 2020/21 financial statements of the Council. We will consider the impact of this as part of the 2020/21 financial statement audit risk assessment and procedures.

We note that the Council took the decision to retain an agency member of staff through the end of the 2019/20 audit and into the 2020/21 audit in order to retain knowledge across financial years and to review working papers that support the 2020/21 financial statements in advance of the 2020/21 audit.

07

Independence

Independence

Confirmation

We confirm that there are no changes in our assessment of independence since our confirmation in our Audit Plan dated 9 June 2020.

We complied with the APB Ethical Standards. In our professional judgement the firm is independent and the objectivity of the audit engagement partner and audit staff has not been compromised within the meaning of regulatory and professional requirements.

We consider that our independence in this context is a matter which you should review, as well as us. It is important that you and your Audit Committee consider the facts known to you and come to a view. If you would like to discuss any matters concerning our independence, we will be pleased to do this at the meeting of the Audit Committee on 27 March 2023.

Relationships, services and related threats and safeguards

The FRC Ethical Standard requires that we provide details of all relationships between Ernst & Young (EY) and your Council, and its directors and senior management and its affiliates, including all services provided by us and our network to your Council, its directors and senior management and its affiliates, and other services provided to other known connected parties that we consider may reasonably be thought to bear on the our integrity or objectivity, including those that could compromise independence and the related safeguards that are in place and why they address the threats.

There are no relationships from 01 April 2019 to the date of this report, which we consider may reasonably be thought to bear on our independence and objectivity.

Services provided by Ernst & Young

Below includes a summary of the fees that you have paid to us in relation to the year ended 31 March 2020 in line with the disclosures set out in FRC Ethical Standard and in statute.

We confirm that none of the services listed in have been provided on a contingent fee basis.

As at the date of this report, there are no future services which have been contracted and no written proposal to provide non-audit services has been submitted.

Fee analysis

As part of our reporting on our independence, we set out below a summary of the fees for the year ended 31 March 2020.

We confirm that we have not undertaken non-audit work outside the NAO Code requirements. We have adopted the necessary safeguards in completing this work and complied with Auditor Guidance Note 1 issued by the NAO.

The duty to prescribe fees is a statutory function delegated to Public Sector Audit Appointments Ltd (PSAA) by the Secretary of State for Housing, Communities and Local Government. This is defined as the fee required by auditors to meet statutory responsibilities under the Local Audit and Accountability Act 2014 in accordance with the requirements of the Code of Audit Practice and supporting guidance published by the National Audit Office, the financial reporting requirements set out in the Code of Practice on Local Authority Accounting published by CIPFA/LASAAC, and the professional standards applicable to auditors' work.

	Final fee 2019/20	Scale fee 2019/20	Final Fee 2018/19
	£	£	£
Scale fee - Code work	49,283	49,283	49,283
Scale fee variation - Code work	TBC (Note 1)	-	28,142
Total Audit Fee	TBC (Note 1)	49,283	77,425
Other non-audit services (Housing Benefits Certification)	38,800	-	24,400
Total All Fees	TBC (Note 1)	49,283	101,825

Note 1

For 2019/20 we do not believe the existing scale fees provide a clear link between a public sector organisation's risk and complexity and the increased regulatory requirements to deliver an ISA compliant audit. Further background and context of the audit fee for 2019/20 is set out on the next two pages.

We have discussed this context and the fee implications for 2019/20 as we see them with the Strategic Director (CFO). As communicated in our Audit Plan dated June 2020, we estimated the audit indicative fee for Stevenage Borough Council would be between £120k and £150k based on on the risk profile of the Council.

(all fees exclude VAT)

At the conclusion stage of the audit, we estimate the total 2019/20 audit fee for Stevenage Borough Council to be between £175k and £185k. The CFO does not currently agree with this fee. However, we consider that the fee is reflective of both:

(i) the areas of scope for the audit that are not included in PSAA's base scale fee, including:

- Audit of the Council's group financial statements,
- Complexities of the Queensway lease arrangement,
- The financial resilience value for money risk, and
- The increase in expectations of the quality of the audit driven by increased FRC requirements.

(ii) the complexities encountered during the 2019/20 audit of the Council, including:

- The impacts of Covid-19 on the audit, including our re-assessment of audit risks and response to those risks, including reduced materiality for the audit.
- The number and complexity of audit differences identified during the audit,
- The extent of specialist support required from internal EY teams to respond appropriately to the risks of material misstatement,
- The successive turnover of the key finance contacts (5 individuals), with little handover between officers, and
- The quality of the Council's working papers to support the financial statements and the audit.

Fee analysis (continued)

We do not believe the existing scale fees provide a clear link with both a public sector organisation's risk and complexity. For an organisation such as Stevenage Borough Council and the audit complexities encountered the extent of audit procedures now required mean it will take approximately 1,600 hours to complete a quality audit, due the complexities of the 2019/20 audit for Stevenage Borough Council, the 2019/20 audit has take over 3,200 hours. Your scale fee is £49,283 and our current estimate is a final fee is between £175,000 and £185,000.

Summary of key factors

1. **Status of sector.** Financial reporting and decision making in local government has become increasingly complex, for example from the growth in commercialisation, speculative ventures and investments. This has also brought increasing risk about the financial sustainability / going concern of bodies given the current status of the sector.
 - ▶ To address this risk our procedures now entail higher samples sizes of transactions, the need to increase our use of analytics data to test more transactions at a greater level of depth. This requires a continual investment in our data analytics tools and audit technology to enhance audit quality. This also has an impact on local government with the need to also keep pace with technological advancement in data management and processing for audit.
2. **Audit of estimates.** There has been a significant increase in the focus on areas of the financial statements where judgemental estimates are made. This is to address regulatory expectations from FRC reviews on the extent of audit procedures performed in areas such as the valuation of land and buildings and pension assets and liabilities.
 - ▶ To address these findings, our required procedures now entail higher samples sizes, increased requirements for corroborative evidence to support the assumptions, use of our internal specialists and increased correspondence with external specialists.
3. **Regulatory environment.** Other pressures come from the changing regulatory landscape and audit market dynamics:
 - ▶ Parliamentary select committee reports, the Brydon and Kingman reviews, plus within the public sector the Redmond review and the new NAO Code of Audit practice are all shaping the future of Local Audit. These regulatory pressures all have a focus on audit quality and what is required of external auditors.
 - ▶ This means continual investment in our audit quality infrastructure in response to these regulatory reviews, the increasing fines for not meeting the requirements plus changes in auditing and accounting standards. As a firm our compliance costs have now doubled as a proportion of revenue in the last five years. The regulatory lens on Local Audit specifically, is greater. We are three times more likely to be reviewed by a quality regulator than other audits, again increasing our compliance costs of being within this market.

Fee analysis (continued)

Summary of key factors (continued)

4. As a result public sector auditing has become less attractive as a profession, especially due to the compressed timetable, regulatory pressure and greater compliance requirements. This has contributed to higher attrition rates in our profession over the past year and the shortage of specialist public sector audit staff and multidisciplinary teams (for example valuation, pensions, tax and accounting) during the compressed timetables.
 - ▶ We need to invest over a five to ten-year cycle to recruit, train and develop a sustainable specialist team of public sector audit staff. We and other firms in the sector face intense competition for the best people, with appropriate public sector skills, as a result of a shrinking resource pool. We need to remunerate our people appropriately to maintain the attractiveness of the profession, provide the highest performing audit teams and protect audit quality.
 - ▶ We acknowledge that local authorities are also facing challenges to recruit and retain staff with the necessary financial reporting skills and capabilities. This though also exacerbates the challenge for external audits, as where there are shortages it impacts on the ability to deliver on a timely basis.

Next steps

We have informed the CFO of the proposed audit fee for the 2019/20 audit. The CFO does not agree with the total audit fee of £175k to £185k.

We will share and discuss the detail of the scale fee variation with the CFO for further comment. We will submit our proposed scale fee variation to PSAA for their review and determination.

We will communicate with this Audit Committee at the next available opportunity the outcome of this process.

New UK Independence Standards

The Financial Reporting Council (FRC) published the Revised Ethical Standard 2019 in December and it will apply to accounting periods starting on or after 15 March 2020. A key change in the new Ethical Standard will be a general prohibition on the provision of non-audit services by the auditor (and its network) which will apply to UK Public Interest Entities (PIEs). A narrow list of permitted services will continue to be allowed.

Summary of key changes

- Extraterritorial application of the FRC Ethical Standard to UK PIE and its worldwide affiliates
- A general prohibition on the provision of non-audit services by the auditor (or its network) to a UK PIE, its UK parent and worldwide subsidiaries
- A narrow list of permitted services where closely related to the audit and/or required by law or regulation
- Absolute prohibition on the following relationships applicable to UK PIE and its affiliates including material significant in vestees/investors:
 - Tax advocacy services
 - Remuneration advisory services
 - Internal audit services
 - Secondment/loan staff arrangements
- An absolute prohibition on contingent fees.
- Requirement to meet the higher standard for business relationships i.e. business relationships between the audit firm and the audit client will only be permitted if it is inconsequential.
- Permitted services required by law or regulation will not be subject to the 70% fee cap.
- Grandfathering will apply for otherwise prohibited non-audit services that are open at 15 March 2020 such that the engagement may continue until completed in accordance with the original engagement terms.
- A requirement for the auditor to notify the Audit Committee where the audit fee might compromise perceived independence and the appropriate safeguards.
- A requirement to report to the audit committee details of any breaches of the Ethical Standard and any actions taken by the firm to address any threats to independence. A requirement for non-network component firm whose work is used in the group audit engagement to comply with the same independence standard as the group auditor. Our current understanding is that the requirement to follow UK independence rules is limited to the component firm issuing the audit report and not to its network. This is subject to clarification with the FRC.

Next Steps

We will continue to monitor and assess all ongoing and proposed non-audit services and relationships to ensure they are permitted under FRC Revised Ethical Standard 2016 which will continue to apply 31 March 2020 as well as the recently released FRC Revised Ethical Standard 2019 which will be effective from 1 April 2020. We will work with you to ensure orderly completion of the services or where required, transition to another service provider within mutually agreed timescales.

We do not provide any non-audit services which would be prohibited under the new standard.

Other communications

EY Transparency Report 2021

Ernst & Young (EY) has policies and procedures that instil professional values as part of firm culture and ensure that the highest standards of objectivity, independence and integrity are maintained.

Details of the key policies and processes in place within EY for maintaining objectivity and independence can be found in our annual Transparency Report which the firm is required to publish by law. The most recent version of this Report is for the year end 30 June 2022:

Management Rep Letter

To follow as a separate item in the Audit Committee papers.

Appendix C - Audit Report

Draft audit report

This is an example report. Our audit report will not be completed and issued until the work and internal consultation are complete.

Our opinion on the financial statements

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF STEVENAGE BOROUGH COUNCIL

Opinion

We have audited the financial statements of Stevenage Borough Council for the year ended 31 March 2020 under the Local Audit and Accountability Act 2014. The financial statements comprise the:

- Authority and Group Movement in Reserves Statement,
- Authority and Group Comprehensive Income and Expenditure Statement,
- Authority and Group Balance Sheet,
- Authority and Group Cash Flow Statement and the related notes 1 to [x];
- Collection Fund and the related notes 1 to [x]]; and
- Statement of Accounting Policies

The financial reporting framework that has been applied in their preparation is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2019/20 as amended by the Update to the Code and Specifications for Future Codes for Infrastructure Assets (November 2022).

In our opinion the financial statements:

- give a true and fair view of the financial position of Stevenage Borough Council as at 31 March 2020 and of its expenditure and income for the year then ended; and
- have been prepared properly in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2019/20 as amended by the Update to the Code and Specifications for Future Codes for Infrastructure Assets (November 2022).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of Stevenage Borough Council in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard and the Comptroller and Auditor General's AGN01, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The other information comprises the information included in the Statement of Accounts 2019/20, other than the financial statements and our auditor's report thereon. The Chief Finance Officer is responsible for the other information.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. We have nothing to report in this regard.

Appendix C - Audit Report

Our opinion on the financial statements

Opinion on other matters prescribed by the Local Audit and Accountability Act 2014

Arrangements to secure economy, efficiency and effectiveness in the use of resources

In our opinion, based on the work undertaken in the course of the audit, having regard to the guidance issued by the Comptroller and Auditor General in April 2020, we are satisfied that, in all significant respects, Stevenage Borough Council put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2020.

Matters on which we report by exception

We report to you if:

- in our opinion the annual governance statement is misleading or inconsistent with other information forthcoming from the audit or our knowledge of the Council;
- we issue a report in the public interest under section 24 of the Local Audit and Accountability Act 2014;
- we make written recommendations to the audited body under Section 24 of the Local Audit and Accountability Act 2014;
- we make an application to the court for a declaration that an item of account is contrary to law under Section 28 of the Local Audit and Accountability Act 2014;
- we issue an advisory notice under Section 29 of the Local Audit and Accountability Act 2014; or
- we make an application for judicial review under Section 31 of the Local Audit and Accountability Act 2014.

We have nothing to report in these respects.

Responsibility of the Chief Finance Officer

As explained more fully in the Statement of Responsibilities set out on pages [...], the Chief Finance Officer is responsible for the preparation of the Statement of Accounts, which includes the financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2019/20 as amended by the Update to the Code and Specifications for Future Codes for Infrastructure Assets (November 2022), and for being satisfied that they give a true and fair view.

In preparing the financial statements, the Chief Finance Officer is responsible for assessing the Authority's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Authority either intends to cease operations, or have no realistic alternative but to do so.

The authority is responsible for putting in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources, to ensure proper stewardship and governance, and to review regularly the adequacy and effectiveness of these arrangements.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Appendix C - Audit Report

Our opinion on the financial statements

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Scope of the review of arrangements for securing economy, efficiency and effectiveness in the use of resources

We have undertaken our review in accordance with the Code of Audit Practice, having regard to the guidance on the specified criterion issued by the Comptroller and Auditor General in April 2020, as to whether Stevenage Borough Council had proper arrangements to ensure it took properly informed decisions and deployed resources to achieve planned and sustainable outcomes for taxpayers and local people. The Comptroller and Auditor General determined this criterion as that necessary for us to consider under the Code of Audit Practice in satisfying ourselves whether Stevenage Borough Council put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2020.

We planned our work in accordance with the Code of Audit Practice. Based on our risk assessment, we undertook such work as we considered necessary to form a view on whether, in all significant respects, Stevenage Borough Council had put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources.

We are required under Section 20(1)(c) of the Local Audit and Accountability Act 2014 to satisfy ourselves that the Authority has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the National Audit Office (NAO) requires us to report to you our conclusion relating to proper arrangements.

We report if significant matters have come to our attention which prevent us from concluding that the Authority has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources. We are not required to consider, nor have we considered, whether all aspects of the Authority's arrangements for securing economy, efficiency and effectiveness in its use of resources are operating effectively.

Certificate

We certify that we have completed the audit of the accounts of Stevenage Borough Council in accordance with the requirements of the Local Audit and Accountability Act 2014 and the Code of Audit Practice issued by the National Audit Office.

Debbie Hanson (Key Audit Partner)
