E&E Final Report & Recs Climate Emergency	Continuation of review (23 03 22)	N/A continuatio of review	Final part of review started 23 06 22	Final report 17 01 23	<p>1. SBC & Area Wide Pathway & Targets - It is recommended that clear targets and a pathway to 2030 for both SBC targets and area wide targets need to be established. It is not currently clear what the targets or pathway are to see how Stevenage gets from where it is now to 2030. The way progress against the 2018 baseline figure is measured and publicised needs to be thought through so that this is clearly described to show what progress is being made each year and understood by officers, Members and by the public.</p> <p>2. Pace - Is the climate emergency really being treated as an emergency? It is recommended that there is a need to ramp up the pace to get to net zero for the town by 2030. Members accept there are challenges around funding but where it sits in corporate priorities is an area that is a decision for the authority. Members will be looking to see how the pace is picked up leading to 2030.</p> <p>3. Adaptations - The review established that due to extreme weather events linked to climate change there is already a need for adaptations to buildings and for up-to-date emergency response plans to care for older residents in sheltered housing schemes. It is recommended that there be an audit of all adaptations required across the Council.</p> <p>4. Behaviour Change - It is recommended that officers from SBC link up with officers from the HCC Behaviour Change unit to work together on behaviour change initiatives.</p> <p>5. Review - It has been recommended by the Chair of the Environment and Economy Select Committee that the issue of the climate emergency should be under regular review by the Committee and that a progress report should be brought back to the committee on a yearly basis.</p> <p>6. Training - The Committee recommends the creation of a training package for members, and additional training for senior officers, on climate change mitigations and adaption, so that future decision makers are well informed in all aspects of the councils' operations, and the bearing climate change mitigation and adaption may have on them.</p>	Exec Member response - 23 03 23	To be scheduled
